

tutorial link : <http://www.vogella.com/articles/ApacheAnt/article.html>

- 1.install ant using *apt-get install ant*
- 2.create a java project Ant-Test
- 3.inside Ant-Test , create two folders - src and build
- 4.Inside src, create two folders - math and test
- 5.put MyMath.java in math folder and Main.java in test folder
- 6.Create a file build.xml and place it in build folder and also in Ant-Test folder
- 7.Goto terminal and switch to Ant-Test folder and build using `ant -f build.xml`
